Fazekas Mihály Primary and Secondary-grammar
Practice School in Budapest

Address: Horváth Mihály tér 8., H-1082 Budapest, Hungary

TEACHING CAREER IN BRIEF

I graduated from Eötvös Loránd University of Arts and Sciences in Budapest in 2020. I got a degree as a primary and secondary school Biology and Geography teacher. During my university years, I had the opportunity to continue my studies in Stockholm through the Erasmus+ Program in 2017, which had a significant impact on my professional development. I gained a huge amount of experience and observed effective practices during Swedish university seminars and fieldwork, which I strive to incorporate into my lesson-planning day by day. I completed my one-year teaching internship at the Fazekas Mihály Primary and Secondary-grammar Practice School in Budapest, where I have been teaching both primary and secondary school students ever since. In addition to teaching, I also take part in the organization of the Fazekas Biology Competition and the Herman Ottó Carpathian Basin Biology Competition. In the past few years I participated as a curriculum and digital content developer in two health education projects run by the Hungarian Educational Authority. In 2023 and 2024 I applied for the Richter Gedeon Creative Award for Young Science Teachers. I was delighted to receive the award in both years, alongside many talented colleagues. My teaching philosophy is rooted in practicality. I am to make my students be able to acquire knowledge that they can apply in their everyday lives and inspire them to become curious young individuals eager to understand how the world works.
